PROFESSIONAL SUMMARY

Odoo Developer and Technical Consultant with 7 months of experience delivering ERP solutions across Odoo versions 13–19 for clients. Skilled in custom module development, QWeb/PDF and Excel report customization, end-to-end version migrations (v13→v19), and third-party API integrations. Combines strong Python/XML development with hands-on technical consulting, including requirement analysis, solution design, and client support, to deliver scalable, business-ready Odoo systems.

WORK EXPERIENCE

Odoo Developer

2026 – Present

TeamUp4Solutions

- Developed and customized Odoo modules using Python, Odoo ORM, XML, JavaScript/OWL, including models, views, workflows, security rules, menus, and business logic.
- Led Odoo migration projects (16→18, 16→19), resolving view/XML compatibility issues, ORM/API changes, OWL updates, dependencies, and database-related errors.
- Worked across multiple Odoo projects and modules, including DHA/Real Estate & Property Management, HR, Airline/Booking, Hospital, Sales, Purchase, Inventory, POS, CRM, Accounting, Maintenance, Approvals, custom reporting, third-party integrations.
- Developed QWeb/PDF and dynamic Excel (XLSX) reports for invoices, receipts, payment vouchers, delivery documents, purchasing, sales, and analytical requirements.
- Implemented automated approvals, validations, sequences, invoice workflows, access restrictions, and client-specific business processes.
- Integrated Odoo with third-party applications/APIs and customized existing Odoo modules to meet client requirements.
- Diagnosed complex Odoo, PostgreSQL, XML, OWL/JavaScript, and database issues, including module installation, migration, schema, and data-integrity problems.
- Managed Linux-based Odoo deployments, PostgreSQL databases, backups/restores, dependencies, and server configuration across self-hosted environments.
- Used Git/GitHub for source control and collaborative development across multiple Odoo projects.
